Annual Financial Statements for the year ended 30 June 2020

## Accounting Officer's Responsibilities and Approval

---

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the City as at 30 June 2020 and the results of its operations and cash flows for the year then ended.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

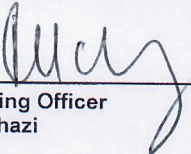

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the City and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the City and all employees are required to maintain the highest ethical standards in ensuring the City's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the City is on identifying, assessing, managing and monitoring all known forms of risk across the City. While operating risk cannot be fully eliminated, the City endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

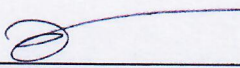

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the City's cash flow forecast for the year to 30 June 2021 and, in the light of this review and the current financial position, she is satisfied that the City has or has access to adequate resources to continue in operational existence for the foreseeable future.

The accounting officer is responsible for the financial affairs of the City, and she is assisted by the City's Senior Management team.

The annual financial statements set out on pages 4 to 84, which have been prepared on the going concern basis, were approved by the accounting officer on 31 October 2020 and were signed on its behalf by:

  
\_\_\_\_\_  
Accounting Officer  
Dr. I Mashazi

### 1. Presentation of Annual Financial Statements

#### Basis of Preparation

The annual financial statements were prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003).

The annual financial statements were prepared on the accrual basis of accounting and incorporate the historical cost conventions as the basis of measurement, except where otherwise specified.

In the absence of an issued and effective Standard of GRAP, accounting policies for material transactions, events or conditions were developed in accordance with paragraphs 8, 10 and 11 of GRAP 3 as read with Directive 5 (GRAP Reporting Framework).

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

The principal accounting policies, applied in the preparation of the annual financial statements, are set out below. These accounting policies are consistent with those applied in the preparation of the prior year annual financial statements, unless, otherwise specified. Details of any changes in the accounting policies are provided in the note "Changes in accounting policy."

The amounts presented in the financial statements are rounded to the nearest rand.

## Accounting Policies

---

### 1.1 Significant judgements and sources of estimation uncertainty

In the process of applying the City's accounting policies, management has made the following significant accounting judgements, estimates and assumptions, which have significant effect on the amounts recognised in the annual financial statements. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively:

#### • Going Concern

Management considers key financial metrics and approved medium-term budgets, together with the City's dependency on the grants from national and provincial government, to conclude that the going concern assumptions used in the compilation of its annual financial statements, is appropriate.

#### • Operating lease commitments - City as lessor or leases

Leases where risks and rewards of ownership are not transferred to the lessee are classified as operating leases. Payments received or paid under operating leases are recognised in statement of financial performance on a straight-line basis over the period of the lease.

#### • Pension and other post – employment benefits

The cost of defined-benefit pension plans and other employment medical benefits is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Due to the long-term nature of these plans, such estimates are subject to significant uncertainty. Further assumptions and estimates are disclosed in **note 15** to the financial statements.

#### • Cash-generating assets

The City is not a profit-oriented entity as its primary objective is service delivery. Tariffs and charges are cost-reflective to ensure continued financial sustainability. No profit element is included in the determination of a tariff.

As such, management has determined that the city does not control assets that meet the definition of cash-generating assets, and that the GRAP standard for the impairment of non-cash-generating assets will apply to all assets of the city.

#### • Impairment of receivables

The calculation in respect of the impairment of receivables is based on an assessment of the extent to which debtors have defaulted on payments already due, and an assessment of their ability to make payments. The City first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. Accordingly, management believes no further credit provisions are required in excess of the present allowance for doubtful debts.

#### • Impairment of property, plant and equipment

The calculation in respect of the impairment of property, plant and equipment is based on an assessment of the extent to which the recoverable amount of the asset has declined below the carrying amount. This was performed across all classes of property, plant and equipment.

#### • Residual value of property, plant and equipment

Management has determined that none of its infrastructure assets have an active market value, and the value of the amount at the end of their useful lives would therefore be insignificant.

#### • Useful lives of property, plant and equipment and investment property held at cost

The useful lives of assets are based on management's estimates. Management considers the impact of technology, service requirements and required return on assets to determine the optimum useful-life expectation, where appropriate. The estimated residual values of assets are also based on management judgements on whether the assets will be sold or used to the end of their useful lives, and what their condition will be at that time.

#### • Significant delays in assets under construction

The City regards delays in assets under construction of more than three years as significant. Further disclosures are made in **notes 2 to 5** to the financial statements.

#### • Investment accounted using the cost model

The City has accounted for the investment in Rand airport using the cost model, the City has a 20% shareholding. The reason for accounting this under the cost model is due to the fact the city has not exercised significant control, does not participate in operations or management decision nor serve on the board of directors of the entity.

#### • Provisions, contingent liabilities and contingent assets

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

Management's judgement is required when recognising and measuring provisions, as well as when measuring contingent liabilities and assets. Provisions are discounted, where the effect of discounting is material, using cost of capital.

### • Traffic Fines

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset. Assets arising from fines are measured at the best estimate of the inflow of resources to the City.

### • Budget information

A difference of 8% or more between budget and actual amounts is regarded as material. All material differences are explained in the notes to the annual financial statements.

### • Material losses

Material losses are losses that occur due to factors other than normal production and utilisation, and are regarded as material if their omission or misstatement will affect the decisions made by users of the information. The losses disclosed include that of technical losses and non-technical losses related to water and electricity.

Losses that occur due to normal production and utilisation are classified as production costs and factored into the City's tariffs. They, therefore, do not constitute material losses. If actual production and utilisation losses exceed the normal budgeted production and utilisation losses factored into the tariff, this difference is considered material losses.

### • Service charges

Service charges relating to electricity, water and sanitation are based on consumption. Waste removal is based on the size of the bin and the number of times it is collected. Meters are read and billed on a monthly basis and revenue is recognised when invoiced. Estimates of consumption are made monthly when meter readings have not been performed. The estimates of consumption are recognised as revenue when invoiced. Adjustments to estimates of consumption are made in the invoicing period when meters have been read. These adjustments are recognised as revenue in the invoicing period. Waste removal services are billed on a monthly basis.

### Services provided on a prepaid basis

Various services are provided on a prepaid basis in which case no formal billing takes place and revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date.

## 1.2 Presentation currency

This annual financial statements are presented in South African Rand, which is the functional currency of the City.

# City of Ekurhuleni Metropolitan Municipality

## Accounting Policies

---

### 1.3 Investment property

Investment property includes property (land or a building, or part of a building, or both land and buildings held under a finance lease) held to earn rentals and/or for capital appreciation, rather than held to meet service delivery objectives, the production or supply of goods or services, or the sale of an asset in the ordinary course of operations.

Investment property is recognised as an asset when, and only when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the enterprise, and the cost or fair value of the investment property can be measured reliably.

At initial recognition, the City measures investment property at cost including transaction costs, once it meets the definition of investment property. However, where an investment property was acquired through a non-exchange transaction (i.e. where it acquired the investment property for no or a nominal value), its cost is its fair value as at the date of acquisition.

#### Cost model

Investment property is subsequently measured using the cost model. Under the cost model, investment property is carried at cost less any accumulated depreciation and any accumulated impairment losses.

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. The City depreciates separately each part of an item of investment property that has a cost that is significant in relation to the total cost of the item. A significant part of an item of investment property may have a useful life and a depreciation method that are the same as the useful life and the depreciation method of another significant part of that same item. Such parts may be grouped in determining the depreciation charge. Costs of replacing parts are capitalised and the existing parts being replaced are derecognised. The annual depreciation rates are based on the following estimated average asset lives:

Item	Useful life
Property - land	Indefinite
Property - buildings	14 - 80 years

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in the statement of financial performance in the period of retirement or disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in the statement of financial performance when the compensation becomes receivable.

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.4 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the City; and
- the cost or the fair value of the item can be measured reliably.

Property, plant and equipment is initially measured at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost. Cost also includes initial estimate of the costs of dismantling and removing the asset and restoring the site on which it is located. Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management. Servitudes that are acquired with the relevant infrastructure items are capitalised with the relating infrastructure asset when it is an integral part of the asset.

Assets under construction represents capital expenditure incurred on projects not yet completed nor ready for use at period end. Assets under construction are carried at cost.

Property, plant and equipment are subsequently measured at cost, less accumulated depreciation and accumulated impairment losses. Where property, plant and equipment are acquired through non-exchange transactions, the cost is deemed to be the item's fair value on the date of acquisition. The cost of an item of property, plant and equipment acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets is measured at its fair value. If the acquired item could not be measured at its fair value, its cost was measured at the carrying amount of the asset given up.

Subsequent cost is capitalised when the recognition and measurement criteria of an asset are met.

Items such as spare parts, standby equipment and servicing equipment are recognised when they meet the definition of property, plant and equipment.

The City maintains and acquires assets to provide a social service to the community. The useful lives and economic lives of these assets are equal and consequently no residual values are determined.

The City depreciates separately each part of an item of property, plant and equipment that has a cost that is significant in relation to the total cost of the item. A significant part of an item of property, plant and equipment may have a useful life and a depreciation method that are the same as the useful life and the depreciation method of another significant part of that same item. Such parts may be grouped in determining the depreciation charge. Costs of replacing parts are capitalised and the existing parts being replaced are derecognised. Depreciation is calculated at cost, using the straight-line method, over the estimated useful lives of the assets. Depreciation starts when the asset is available for use. Assets under construction are not depreciated.

The depreciation rates are based on the following estimated useful lives:

Item	Useful life
Land	Indefinite
Buildings	14 - 80 years
<b>Infrastructure</b>	
Roads and stormwater	2 - 100 years
Pedestrian bridges	10 - 60 years
Electricity	3 - 100 years
Water	3 - 100 years
Sewer	3 - 100 years
Housing	80 years
Solid Waste	5 - 100 years
ICT	5 - 50 years
Waste water purification works	2 - 82 years
<b>Community</b>	
Buildings	14 - 80 years
Recreational facilities	10 - 80 years
Security	5 - 15 years
Landfill sites	10 - 80 years
<b>Other property, plant and equipment</b>	
Furniture and fittings	3 - 33 years
Water craft	15 years
Office equipment	3 - 35 years
Specialised plant and equipment	10 - 26 years
Other items of plant and equipment	2 - 29 years
Buildings	20 - 80 years

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.4 Property, plant and equipment (continued)

Specialised vehicles	3 - 20 years
Other vehicles	3 - 28 years

Assets under construction are not depreciated.

The asset management policy contains the details of the components and their specific useful life estimates.

The residual value, the useful life and the depreciation method of property, plant and equipment are reviewed at least at every reporting date.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the statement of financial performance.

The City assesses at each reporting date whether there is any indication that the City expectations about the residual value and the useful life of an asset has changed since the preceding reporting date. If any such indication exists, the City revises the expected useful life and/or residual value accordingly. The change is accounted for as a change in an accounting estimate.

The depreciation charge for each period is recognised in the statement of financial performance unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in the statement of financial performance when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Compensation from third parties for items of property, plant and equipment that were impaired, lost or given up is included in surplus or deficit when the compensation becomes receivable.

### 1.5 Intangible assets

Intangible assets are identifiable non-monetary assets without physical substance held for use in the production or supply of goods or services, for rental to others, or for administrative purposes are classified and recognised as intangible assets and obligations.

Intangible assets are initially recognised at cost. The cost of an intangible asset is the purchase price and other costs attributable to bring the intangible asset to the location and condition necessary for it to be capable of operating in the manner intended by the City, or where an intangible asset is acquired at no cost, or for a nominal cost, the cost shall be its fair value as at the date of acquisition. Trade discounts and rebates are deducted in arriving at the cost.

Intangible assets acquired separately or internally generated are reported at cost less accumulated amortisation and accumulated impairment losses.

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential. Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Intangible assets are derecognised on disposal, or when no future economic benefits are expected from its use or disposal. Internally generated brands, mastheads, publishing titles, customer lists and items similar in substance are not recognised as intangible assets.

Amortisation to intangible assets is provided on a straight line basis as follows:

Item	Useful life
Computer software	1 - 23 years
Servitudes	indefinite

The gain or loss arising from the derecognition of an intangible asset is recognised in the statement of financial performance when the asset is derecognised.

An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- > it is technically feasible to complete the asset so that it will be available for use or sale.
- > there is an intention to complete and use or sell it.
- > there is an ability to use or sell it.
- > it will generate probable future economic benefits or service potential.
- > there are available technical, financial and other resources to complete the development and to use or sell the asset.
- > the expenditure attributable to the asset during its development can be measured reliably.

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.6 Heritage assets

A heritage asset is as an asset that has a cultural, environmental, historical, natural, scientific, technological or artistic significance, and is held indefinitely for the benefit of present and future generations.

The City recognises a heritage asset as an asset if it is probable that future economic benefits or service potential associated with the asset will flow to the City, and the cost or fair value of the asset can be measured reliably.

Heritage assets are measured at cost. Where a heritage asset is acquired through a non-exchange transaction, its cost is measured at its fair value as at the date of acquisition. The cost of a purchased heritage asset comprises:

- its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates; and
- any costs directly attributable to bringing the heritage asset to the location and condition necessary for it to be capable of operating in the manner intended by management.

Heritage assets are subsequently measured at cost, less accumulated impairment losses. Where a heritage asset is acquired through a non-exchange transaction, its cost is deemed to be its fair value as at the date of acquisition.

Transfers to heritage assets are made only when the asset meets the definition of a heritage asset and transfers from heritage assets are made only when the asset no longer meets the definition of a heritage asset. Transfers to and from heritage assets are done at the carrying amount of the assets transferred at the date of transfer.

The City assess at each reporting date whether there is an indication that it may be impaired. If any such indication exists, the City estimates the recoverable amount or the recoverable service amount of the heritage asset.

Most heritage assets have an indefinite useful life as they are to be preserved for current and future generations and might appreciate in value over time due to their cultural, environmental, historical, natural, scientific, technological and/or artistic significance. Based on this analysis, there is no definite limit to the period over which a heritage asset is expected to be held by the City. The useful life of the heritage asset is therefore likely to be indefinite or the annual depreciation is likely to be immaterial.

The City derecognises heritage asset on disposal, or when no future economic benefits or service potential are expected from its use or disposal. The gain or loss arising from the derecognition of a heritage asset is recognised in the statement of financial performance when the asset is derecognised.

### 1.7 Investments in controlled entities

Municipal controlled entities are those entities which the City owns or over whose financial and operating policies it has the power to exercise beneficial control.

In the City's annual financial statements, investments in controlled entities are carried at cost less any accumulated impairment.

### 1.8 Financial instruments

#### Financial Instruments

A financial instrument is recognised if the City becomes a party to the contractual provisions of the instrument.

#### Financial Assets

A financial asset is any asset that is a cash or contractual right to receive cash. In accordance with the Standards of GRAP 104 the Financial Assets of the City are classified as follows into the three categories allowed by this standard:

- Financial asset at amortised cost being a non-derivative financial asset with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for maturities greater than 12 months, which are classified as non-current asset
- Financial assets measured at fair value being financial assets that meet either of the following conditions:
  - a) Derivatives;
  - b) Combined instruments that are designated at fair value;
  - c) Instruments held for trading;
  - d) Non-derivative financial assets or financial liabilities with fixed or determinable payments that are designated at fair value at initial recognition; or
  - e) Financial instruments that do not meet the definition of financial instruments at amortised cost or financial instruments at cost.

Financial assets measured at cost being investments in residual interests that do not have a quoted market price in an active market, and whose fair value cannot be reliably measured.

The City has the following types of financial assets as reflected on the face of the Statement of Financial Position or in the notes thereto:

Type of financial assets	Classifications
Other investments	amortised cost
Receivables from exchange	amortised cost
Cash and cash equivalents	amortised cost
Long-term receivables	amortised cost
Other investments (unlisted shares)	cost

#### Financial Liabilities

A financial liability is a contractual obligation to deliver cash or another financial asset to another entity.

The following main categories of financial liabilities and the classification determining how they are measured exist:

- Financial liabilities measured at fair value; or
- Financial liabilities measured at amortised cost.

The City has the following types of financial liabilities as reflected on the face of the Statement of Financial Position or in the notes thereto:

Type of financial liability	Classifications
Long-term liabilities	amortised cost
Trade and other-payables from exchange transactions	amortised cost
Consumer deposits	amortised cost
Finance lease obligations	amortised cost

#### Initial recognition

The City recognises a financial asset or a financial liability in its statement of financial position when the City becomes a party to the contractual provisions of the instrument.

The City recognises financial assets using trade date accounting.

#### Initial measurement of financial assets and financial liabilities

The City measures a financial asset and financial liability initially at its fair value plus, in the case of a financial asset or a liability not subsequently measured at fair value, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

The City first assesses whether the substance of a concessionary loan is in fact a loan. On initial recognition, the City analysis a concessionary loan into its component parts and accounts for each component separately. The City accounts for that part of a concessionary loan that is:

- a social benefit in accordance with the Framework for the Preparation and Presentation of Financial Statements, where it is the issuer of the loan; or
- non-exchange revenue, in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers), where it is the recipient of the loan.

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.8 Financial instruments (continued)

#### Subsequent measurement of financial assets and financial liabilities

The City measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value;
- Financial instruments at amortised cost; and
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review at each reporting period.

#### Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the City establishes fair value by using a valuation technique.

#### Gains and losses

A gain or loss arising from a change in the fair value of a financial asset measured at fair value is recognised in the statement of financial performance.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in the statement of financial performance when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

#### Impairment and uncollectibility of financial assets

The City assess at the end of each reporting period whether there is any objective evidence that a financial asset is impaired.

##### a) Financial assets measured at amortised cost:

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly through the use of an allowance account. The amount of the loss is recognised in the statement of financial performance.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in the statement of financial performance.

##### b) Financial assets measured at cost:

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

#### Derecognition

##### a) Financial assets

The City derecognises financial assets (or part of a financial assets) when the contractual rights to the cash flows from the financial asset expire, are settled or waived or when the City has transferred all of the significant risks and rewards of ownership using trade date accounting.

On derecognition of a financial asset (or part of a financial asset), the difference between the carrying amount and the sum of the consideration received is recognised in the statement of financial performance.

##### b) Financial liabilities

The City removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished (when the obligation specified in the contract is discharged, cancelled, expires or waived).

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in the statement of financial performance. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

#### Presentation

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in the statement of financial performance.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in the statement of financial performance.

Gains and losses relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in the statement of financial performance.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the City currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.8 Financial instruments (continued)

In accounting for a transfer of a financial asset that does not qualify for derecognition, the City does not offset the transferred asset and the associated liability.

### 1.9 Statutory receivables

Statutory receivables are receivables that arise from legislation, supporting regulations, or similar means, and require settlement by another entity in cash or another financial asset.

•The transaction amount for a statutory receivable means the amount specified in, or calculated, levied or charged in accordance with, legislation, supporting regulations, or similar means. Statutory received comprises of Property Rates and Traffic Fines

•An entity shall recognise statutory receivables as follows:

(a) if the transaction is an exchange transaction;

(b) if the transaction is a non-exchange transaction; or

(c) if the transaction is not within the scope of the Standards of GRAP listed in (a) or (b) or another Standard of GRAP, the receivable is recognised when the definition of an asset is met and, when it is probable that the future economic benefits or service potential associated with the asset will flow to the entity and the transaction amount can be measured reliably.

Statutory receivables that that meets the definition of an asset shall be recognised as an asset when, and only when:

(a) it is probable that the future economic benefits or service potential associated with the asset will flow to the entity; and

(b) the fair value of the asset can be measured reliably.

•An entity shall derecognise a statutory receivable, or a part thereof, when:

(a) the rights to the cash flows from the receivable are settled, expire or are waived; or

(b) the entity transfers to another party substantially all of the risks and rewards of ownership of the receivable.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.10 Inventories

Inventories are assets:

- a) in the form of materials or supplies to be consumed in the production process;
- b) in the form of materials or supplies to be consumed or distributed in the rendering of services;
- c) held for sale or distribution in the ordinary course of operations; or
- d) in the process of production for sale or distribution.

Inventories shall be recognised as an asset if, and only if:

- it is probable that future economic benefits or service potential associated with the item will flow to the City; and
- the cost of the inventories can be measured reliably.

Inventories are initially recognised at cost. The cost of inventory shall comprise of all costs, costs of conversion and other costs, incurred to bringing the inventories to their present location and condition.

Where inventory is acquired by the City for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date acquired.

Inventories held for sale in the ordinary course of business are valued at the lower of cost and net realisable value, or where unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost or current replacement cost.

Inventories held for consumption, distribution, consumables stores, raw materials, finished goods and unsold properties, are valued at lower of cost and net replacement cost.

The carrying amount of inventories is recognised as an expense in the period that the inventory was sold, distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset. The first-in-first-out method is the basis of allocating costs to inventories, except for water balance which is determined at weighted average cost at the reporting date based on the water volume in the network on hand.

Redundant and slow-moving inventories are identified and written down to the estimated net realisable value, and are recognised as an expense in the period in which the write-down or loss occurs. Inventories identified for write-down/write-off, but for which a council resolution, to authorise the write-down/write-off, has not yet been obtained, is provided for as a provision for obsolete stock. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

---

### 1.11 Provisions and contingencies

A provision is recognised when the City has a present obligation (legal or constructive) as a result of a past event and it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The City does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date. Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation. The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

A provision is used only for expenditures to which the provision was originally recognised.

#### a) COID provision

The provision for COID pensions and medical aid liability is based on eligible members, their current age and their future life expectancy. Cash flows are projected on the basis of current pension payments escalated at 6.70% (2019: 6.50%) per annum over members' expected lives. Resulting cash flows have been discounted to Net Present Value applying a discount rate of 10.81% (2019: 10.68%).

#### b) Landfill rehabilitation provision

The landfill rehabilitation provision is created for the rehabilitation of the current operational sites at the future estimated time of closure. The value of the provision is based on the expected future cost to rehabilitate the various sites discounted back to the statement of financial position date at the cost of capital (time value of money), which is currently 10.81% (2019: 10.68%).

The City has an obligation to rehabilitate these landfill sites. The cost of such property includes the initial estimate of the costs of rehabilitating the land and restoring the site on which it is located, the obligation for which the City incurs as a consequence of having used the property during a particular period for landfill purposes. The City estimates the useful lives and make assumptions as to the useful lives of these assets, which influence the provision for future costs.

Changes in the measurement of the provision that result from changes in the estimated timing or amount of the outflow of resources embodying economic benefits or service potential required to settle the obligation, or a change in the discount rate, is accounted for as follows:

- a) subject to (b), changes in the liability are added to, or deducted from, the cost of the related asset in the current period;
- b) if a decrease in the liability exceeds the carrying amount of the asset, the excess is recognised immediately in the statement of financial performance; and
- c) if the adjustment results in an addition to the cost of an asset, the City considers whether this is an indication that the new carrying amount of the asset may not be fully recoverable. If such an indication exists, the asset is tested for impairment by estimating its recoverable amount, and any impairment loss is recognised in the statement of financial performance.

The adjusted depreciable amount of the asset is depreciated over its useful life. Therefore, once the related asset has reached the end of its useful life, all subsequent changes in the liability is recognised in the statement of financial performance as they occur.

The periodic unwinding of the discount is recognised in the statement of financial performance as a finance cost as it occurs.

### 1.12 Receivables from non exchange transactions

Non-exchange transaction that meets the definition of an asset shall be recognised as an asset when, and only when:

- (a) it is probable that the future economic benefits or service potential associated with the asset will flow to the entity; and
- (b) the fair value of the asset can be measured reliably.

•An entity shall derecognise a non exchange receivable, or a part thereof, when:

- (a) the rights to the cash flows from the non-receivable are settled, expire or are waived; or
- (b) the entity transfers to another party substantially all of the risks and rewards of ownership of the non-receivable.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.13 Impairment of cash-generating assets

The City classifies all assets held with the primary objective of generating a commercial return as cash-generating assets. A commercial return means that the return charged by the entity is commensurate with the risk associated with holding the asset and the asset is intended to generate positive cash inflows. All other assets are classified as non-cash-generating assets.

The City does not have any cash generating assets, as its primary objective is service delivery.

### 1.14 Impairment of non-cash-generating assets

Non-cash-generating assets are assets other than cash-generating assets.

The City assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the City estimates the recoverable service amount of the asset.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount is the higher of a non-cash generating asset's fair value less costs to sell and its value in use. The value in use for a non-cash generating asset is the present value of the asset's remaining service potential.

The value in use for a non-cash generating asset is the present value of the asset's remaining service potential.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable and willing parties, less the costs of disposal.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

The City assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit.

### 1.15 Employee benefits

The City provides short term benefits, long term benefits and retirement benefits for its employees and councillors.

#### Benefits

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.15 Employee benefits (continued)

#### Short-term employee benefits

Remuneration to employees is recognised in the Statement of Financial Performance as the services are rendered, except for non-accumulating benefits which are only recognised when the specific event occurs.

The costs of all short-term employee benefits such as leave pay, are recognised during the period in which the employee renders the related service.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or in the case of non-accumulating absences, when the absence occurs.

The expected cost of bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance and a reliable estimate can be made at the reporting date.

Liabilities for annual leave are recognised as they accrue to employees. The liability is based on the total accrued leave days at year end, any unused leave days are forfeited six months after the end of leave cycle.

#### Long services awards

The City offers various types of long service awards to its employees. The provision is to recognise the present value of the obligation as at the reporting date.

#### Retirement funds

The City contributes to defined contribution and defined benefit funds. These funds are multi-employer funds.

#### Defined contribution plans

A defined contribution plan is a plan under which the city pays fixed contributions into a separate entity. The City has no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to service in the current or prior periods.

The City's contributions to the defined contribution funds are established in terms of the rules governing those plans. Contributions are recognised in the Statement of Financial Performance in the period in which the service is rendered by the relevant employees.

#### Defined benefit plans

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.15 Employee benefits (continued)

A defined benefit plan is a plan that defines an amount of benefit that an employee will receive on retirement.

The defined benefit liability is the aggregate of the present value of the defined benefit obligation and unrecognised actuarial gains and losses, reduced by unrecognised past service costs. The plan is unfunded. The defined benefit obligation is calculated using the projected unit credit method, incorporating actuarial assumptions and a discount rate based on the government bond rate.

Valuations of these obligations are carried out by independent qualified actuaries regularly, as may be required for fair presentation.

Actuarial gains or losses recognised immediately in the Statement of Financial Performance.

Past service costs are recognised immediately to the extent that the benefits are already vested, and are otherwise amortised on a straight line basis over the average period until the amended benefits become vested.

The City recognises all liabilities and all gains and losses.

Gains or losses on the curtailment or settlement of a defined benefit plan is recognised when the City is demonstrably committed to curtailment or settlement.

When it is virtually certain that another party will reimburse some or all of the expenditure required to settle a defined benefit obligation, the right to reimbursement is recognised as a separate asset. The asset is measured at fair value. In all other respects, the asset is treated in the same way as plan assets. In statement of financial performance, the expense relating to a defined benefit plan is presented as the net of the amount recognised for a reimbursement.

The amount recognised in the statement of financial position represents the present value of the defined benefit obligation as adjusted for unrecognised actuarial gains and losses and unrecognised past service costs, and reduces by the fair value of plan assets.

Any asset is limited to unrecognised actuarial losses and past service costs, plus the present value of available refunds and reduction in future contributions to the plan.

The City does not apply "defined benefit accounting" to the defined benefit funds to which it is a member where these funds are classified in terms of IAS 19 as multi-employer plans, as sufficient information is not available to apply the principles involved.

To the extent that a surplus or deficit in the plan, based on available information, may affect the amount of future contributions, these are assessed. In the case of surpluses, no change is made in the rate of contributions. In the case of deficits, the City will increase contributions on a phased basis. To the extent that the full discounted value of obligations to the funds is not fully accounted for at year end, a contingent liability arises and is reported on accordingly.

### Medical Aid: Continued Members

The City provides post-retirement benefits by subsidising the medical aid contributions of certain retired staff. According to the rules of the medical aid funds, with which the City is associated, a member (subject to the applicable conditions of service), on retirement, is entitled to remain a continued member of such medical aid fund, in which case the member is liable for the portion as determined by Council from time to time, of the medical aid membership fee, and the City for the remaining portion.

### 1.16 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the City receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.16 Revenue from exchange transactions (continued)

Revenue, excluding value-added taxation where applicable, is derived from a variety of sources which include rates levied, grants from other tiers of government and revenue from trading activities and other services provided.

The City recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the City and when specific criteria have been met for each of the City's activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The City bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement. Furthermore services rendered are recognised by reference to the stage of completion of the transaction at the reporting date.

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, stock rotation, price protection, rebates and other similar allowances.

Revenue from exchange transactions refers to revenue that accrued to the City directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

#### Service Charges

Service charges relating to electricity and water are based on consumption. Meters are read on a periodic basis and are recognised as revenue when billed. Provisional estimates of consumption, based on the consumption history, are made monthly when meter readings have not been performed. The provisional estimates of consumption are recognised as revenue when invoiced, except at year-end when estimates of consumption up to year-end are recorded as revenue without it being invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period in which meters have been read. These adjustments are recognised as revenue in the invoicing period. In respect of estimates of consumption between the last reading date and the reporting date, an accrual is made based on the average monthly consumption of consumers.

Service charges relating to refuse removal are recognised on a monthly basis in arrears by applying the approved tariff to each property that has improvements. Tariffs are determined per category of property usage, and are levied monthly based on the number of refuse containers on each property, regardless of whether or not all containers are emptied during the month.

Service charges from sewerage and sanitation are based on the type of service and the number of sewer connections on all developed property, using the tariffs approved by Council and are levied monthly.

In circumstances where services cannot readily be measured and quantified, a flat rate service charge is levied monthly on such properties.

#### Services provided on prepaid

Various services are provided on a prepaid services in which case there is no formal billing takes place and revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date.

#### Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- > the City has transferred to the buyer the significant risks and rewards of ownership of the goods;
- > the City retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- > the amount of revenue can be measured reliably;
- > it is probable that the economic benefits or service potential associated with the transaction will flow to the City;
- > the costs incurred or to be incurred in respect of the transaction can be measured reliably.

#### Income from agency services

Income for agency services, where the entity acts as an agent, is recognised monthly once the income collected on behalf of principals is earned. The income is recognised in terms of the agency agreement.

#### Interest

Interest earned on investments is recognised in the statement of financial performance on a time-proportionate basis, which takes into account the effective yield on the investment.

#### Dividends

Dividends are recognised on the date that the City becomes entitled to receive the dividend in accordance with the substance of the relevant agreement, where applicable.

#### Revenue Recognition of Unclaimed Deposits – exchange revenue

Unclaimed deposits older than one (1) year are recognised as revenue.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.17 Revenue from non-exchange transactions

Revenue from non-exchange transactions refers to transactions where the City received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

#### **Rates and Taxes – non-exchange revenue**

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportion basis with reference to the principal amount receivable and effective interest rate applicable. A composite rating system charging different rate tariffs is employed. Rebates are granted to certain categories of ratepayers and are deducted from revenue.

#### **Fines**

Fines constitute both spot fines and camera fines. Fines are recognised when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset. It is measured at the best estimate, based on past experience, of the amount of revenue the City is expected to enforce.

Subsequent to initial recognition and measurement, the City assess the collectability of the revenue and recognises a separate impairment loss where appropriate.

#### **Donations and Contributions**

Donations and funding are recognised as revenue to the extent that the City has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

#### **Transfers and subsidies**

##### **Unconditional Grants**

Equitable share allocations are recognised in revenue when they are appropriated and received by the City.

##### **Conditional Grants**

Conditional grants recognised as revenue to the extent that the City has complied with any of the criteria, conditions or obligations embodied in the agreement. Where the agreement contains a stipulation to return the asset, other future economic benefits or service potential, in the event of non-compliance to these stipulations and would be enforced by the transferor, a liability is recognised to the extent that the criteria, conditions or obligations have not been met. Where such requirements are not enforceable, or where past experience has indicated that the transferor has never enforced the requirement to return the transferred asset, other future economic benefits or service potential when breaches have occurred, the stipulation will be considered a restriction and is recognised as revenue.

Interest earned on grants received and invested is treated in accordance with grant conditions. If it is payable to the funder it is recorded as part of the creditor and if it is the City's interest it is recognised as interest earned in the Statement of Financial Performance.

##### **Services Received In-kind**

Services in kind are recognised at its fair value when it is significant to the operations and/or service delivery objectives and when it is probable that the future economic benefits or service potential will flow to the entity and the fair value of the assets can be measured reliably. If the services in-kind are not significant to the operations and/or service delivery objectives and/or do not satisfy the criteria for recognition, only the nature and type of services in-kind received during the reporting period is disclosed.

##### **Bequests**

Bequests that satisfy the definition of an asset are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the City, and the fair value of the assets can be measured reliably.

##### **Unspent conditional grants and receipts**

Amounts received before the related work is performed are included in the statement of financial position as a liability, as unspent conditional grants and receipts.

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.18 Grant-in-aid (expense)

The City annually awards grants to individuals and organisations based on merit. When making these transfers, the City does not:

- receive any goods or services directly in return, as would be expected in a purchase or sale transaction;
- expect to be repaid in future; or
- expect a financial return, as would be expected from an investment.

These transfers are recognised in the financial statements as expenses in the period that the events giving rise to the transfer occurred.

### 1.19 Leases

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the City. Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

#### Finance leases – lessee

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

#### Finance leases – lessor

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the interest rate implicit in the lease.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

### 1.20 Borrowing costs

Borrowing costs are interest and other expenses incurred by the City in connection with the borrowing of funds.

Borrowing costs are recognised as an expense in the period in which they are incurred.

### 1.21 Accounting by principals and agents

#### Identification

When an entity is party to a principal-agent arrangement, it shall assess whether it is the principal or the agent in accounting for revenue, expenses, assets and/or liabilities that result from transactions with third parties undertaken in terms of the arrangement. The assessment of whether an entity is a principal or an agent requires the entity to assess whether the transactions it undertakes with third parties are for the benefit of another entity or for its own benefit.

An entity assesses whether it is an agent or a principal by assessing the rights and obligations of the various parties established in the binding arrangement.

When an entity in a principal-agent arrangement concludes that it undertakes transactions with third parties for the benefit of another entity, then it is the agent. If an entity concludes that it is not the agent, then it is the principal in the transactions.

An agent recognises only that portion of the revenue and expenses it receives or incurs in executing the transactions on behalf of the principal. An entity recognises assets and liabilities arising from principal-agent arrangements in accordance with the requirements of other Standards of GRAP.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

---

### 1.22 Value Added Tax

The City accounts for value-added tax (VAT) on the payment basis.

### 1.23 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted for, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, City or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure is accounted for as an expense in the statement of financial performance and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.24 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the statement of financial performance and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.25 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), and the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the City's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the statement of financial performance and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### 1.26 Internal reserves

Included in the accumulated surplus are internal reserves, no separate line items are presented, in accordance with the GRAP reporting framework, but provision is made in the budget process for funding of these reserve. The amounts set aside for these reserves are invested in accordance with the investment policy of the City. The following internal reserves are maintained:

#### Capital replacement reserve (CRR)

The reserve is created for the replacement of service delivery assets when they reach the end of their economic lives to ensure continue of provision of such services, and to minimise the impact of raising external funding or over reliance on grant funds.

#### Self-insurance reserve

A self insurance reserve was established for a self-insurance purpose and to minimize the external insurance costs. The reserve is based on recognised insurance industry principles to complement the external cover provided by insurance companies.

#### Sinking funds reserve

The reserve is created for the provision of repayments of long-term borrowing raised to funds capital projects, and to meet repayment conditions on such borrowings.

### 1.27 Budget information

The approved budget is prepared in accordance with GRAP standards on an accrual basis, and are consistent with accounting policies as adopted by the Council for the preparation of this annual financial statements, and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2019/07/01 to 2020/06/30. These figures are those approved by Council both at the beginning and during the year, following a period of consultation with the public as part of the Integrated Development Plan (IDP). The amounts are scheduled as a separate additional financial statement, called the statement of comparison of budget and actual amounts. Explanatory comments to material differences are provided in the notes to the annual financial statements.

### 1.28 Related parties

Individuals as well as their close family members, and/or entities are related parties if one party has the ability, directly or indirectly, to control or jointly control the other party or exercise significant influence over the other party in making financial and/or operating decisions.

Management is regarded as a related party and comprises the councillors, Executive Mayor, Mayoral Committee members, City Manager, Head of departments and all other managers reporting directly to the City Manager or as designated by the City Manager.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Accounting Policies

### 1.29 Events after reporting date

Events after the reporting date are those events, both favourable and unfavourable, that occur between the reporting date and the date when the financial statements are authorised for issue. Two types of events can be identified:

- those that provide evidence of conditions that existed at the reporting date (adjusting events after the reporting date); and
- those that are indicative of conditions that arose after the reporting date (non-adjusting events after the reporting date).

Reporting date means the date of the last day of the reporting period to which the annual financial statements relate. The City adjusts the amounts recognised in its annual financial statements to reflect adjusting events after the reporting date. The City does not adjust the amounts recognised in its annual financial statements to reflect non-adjusting events after the reporting date.

### 1.30 Commitments

The City discloses capital expenditure as approved in the budget for each class of capital assets (PPE, investment properties, intangible assets and heritage assets) and as well as future minimum lease payments under non-cancellable operating leases. No commitments are disclosed for operating expenditure as the nature of the contracts "As and When required".

### 1.31 Going concern

These annual financial statements were prepared based on the expectation that the City will continue to operate as a going concern for at least the next 12 months. The City's budget for the next financial year as approved by Council is fully funded.

### 1.32 Comparative figures

When the presentation or classification of items in the annual financial statements is amended due to better presentation and/or better understandability and/or comparability and/or due to the implementation of a new or amended standard, prior period comparative amounts are restated. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

### 2. New standards and interpretations

#### 2.1 Standards and interpretations issued, but not yet effective

The following standards and interpretations have been published and are mandatory for the City's accounting periods beginning on or after:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• GRAP 34: Separate Financial Statements	01 July 2020	Unlikely there will be a material impact
• GRAP 35: Consolidated Financial Statements	01 July 2020	Unlikely there will be a material impact
• GRAP 36: Investments in Associates and Joint Ventures	01 July 2020	Unlikely there will be a material impact
• GRAP 37: Joint Arrangements	01 July 2020	Unlikely there will be a material impact
• GRAP 38: Disclosure of Interests in Other Entities	01 July 2020	Unlikely there will be a material impact

#### 2.2 Standards and interpretations not yet effective or relevant

The following standards were approved, but their effective dates were not yet determined by the Minister of Finance:

Standard/ Interpretation:	Expected impact:
• GRAP 110 (as amended 2016): Living and Non-living Resources	Unlikely there will be a material impact
• GRAP 32: Service Concession Arrangements: Grantor	Unlikely there will be a material impact
• GRAP 109: Accounting by Principals and Agents	Unlikely there will be a material impact

#### Assets taking significant longer to complete

The City identified the followings projects deemed to be taking significantly long to complete, the projects taking longer to complete can be categorised into the following reasons, projects in planning and design phase (47 projects), projects in construction phase (28 projects), suspended due to budgets constraints (8 projects) and poor performance (7 projects). These can also be attributed to adverse economic conditions, failing liquidity position and impact of covid 19.

The City did not have any capital projects that took significant longer to complete (2019), as projects are being implemented in phases. There were no projects which were halted during the year.

The City disclosed the aggregate amount per class as per below:

Assets Class	2020	2019

### Assets taking significant longer to complete

The City did not have any projects which took significantly long to complete due to the fact that projects are being implemented in phases. There were no projects which were halted during the year under review.

The transfer (to)/from movement relates to transfers within the asset categories and out of property, plant and equipment, which were affected as follows, an amount of R65 654 835 (2019: R277,121,139) was transferred to inventory. Capital spares were bought as part of the project's capital expenditure, which were transferred to/(from) inventory R118,254,078 (2019: R15,031 251) this relates to the net movement of capital spares for the year between the inventory account and the WIP account, refer note 10.

### Deemed cost

Included in other movement, are additions received from public contributed assets with deemed cost amounts of R143 384 792 (2019: R29,628,665). Deemed cost was determined using fair value or depreciated replacement cost, depending on the most appropriate measurement for the specific asset/scenario.

	<b>2,473,622,604</b>	<b>2,089,662,816</b>

### Residual interest at cost

Fair value information has not been provided for equity instruments that do not have a quoted market price therefore fair value cannot be measured reliably.

The carrying amount of these financial instruments is as follows:

Rand Airport	4,000,000	4,000,000
20% interest in ordinary shares		

The company's draft financial statements used were for the period ended 29 February 2016 and no audited financial information was received for financial years ending 2016 to 2020

The company's equity amounted to R605,743,120 represented by share capital of R5,201,000, reserves of R147,090,563 as well as retained income of R453,451,557 as at 28 February 2016.

The City has not reclassified any financial assets from cost or amortised cost to fair value during the current or prior year.

There were no gains or losses realised on the disposal of held to maturity financial assets for the year ended 2020, as all the financial assets will be disposed of at their redemption date.

Investments with a carrying value of R2,197,566,525 (2019: R1,899,477,077) are held with the top five banks in South Africa for the repayment of long term liabilities with a carrying value of R2,415,000,000 (2019: R2,415,000,000) as disclosed in the long-term liabilities note (note 16). The amount of R2,415,000,000 consists of three bonds for which structured deposit sinking funds were established.

None of the investments at amortised cost are past due or impaired.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

### 8. Other investments (continued)

#### Credit quality of other financial assets

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (as determined by rating agencies) available, or to historical information about counterparty default rates. Investments are only made with South African top five banks.

### 9. Long-term receivables

Non-current receivables	5,469,652	5,437,683
Bad debt provision	(2,124,452)	(2,108,468)
	<b>3,345,200</b>	<b>3,329,215</b>

#### The long-term receivables comprises of:

Rental deposits made	R1,220,747 (June 2019 - R1,220,747)
Housing schemes	R2,124,453 (June 2019 - R2,108,468)

### 10. Inventories

Electrical consumables	212,882,722	371,273,510
Cleansing consumables	3,703,686	1,816,907
Consumable stores	11,827,718	6,597,116
Maintenance materials	17,086,345	18,719,637
Water consumables	16,585,417	12,216,795
Water inventory	8,419,976	10,223,389
Land held as inventory for social housing and development	997,672,782	932,556,347
Fuel (diesel, petrol)	14,395,592	8,952,164
	<b>1,282,574,238</b>	<b>1,362,355,865</b>
	<b>1,282,574,238</b>	<b>1,362,355,865</b>

Inventory written down due to redundancy/obsolescence is valued at R0 (2019: R0) by way of a provision for obsolete inventories.

An amount of R65 654 835 (2019: R277,121,139) was received from property, plant and equipment. Capital spares worth R118,254,078 (2019: R15,031 251) was to property, plant and equipment this relates to the net movement of capital spares for the year between the inventory account and the WIP account.

Included in the inventory balance is land held for social housing development that has been carried for more than 12 months due to the development of the social housing units taking more than 12 months to complete.	932,017,947	113,874,788

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

### 14. Consumer debtors disclosure (continued)

The total debtors for June 2020 includes a total of R2,163,623,877 (2019: R1,822,903,893) in respect of the value of revenue emanating from various meter reading cut-off dates at year end. This is an annual occurrence and is adjusted at every financial year end.

#### Credit quality of consumer debtors

In determining the recoverability of a receivable, the City considers any change in the credit quality of the receivable from the date on which the credit was initially granted, up to the reporting date. The concentration of credit risk is limited but take into consideration the repayments trends and collection rate, as the consumer base is large and unrelated. Accordingly, management believes that further credit provision are required in excess of the present allowance for doubtful debts.

#### Consumer debtors past due but not impaired

30 Days	2,120,780,056	2,315,646,356
60 Days	346,655,195	228,916,046

-------------------	---------------	---------------

### Current liabilities

At amortised cost	2,338,021,378	557,145,611
-------------------	---------------	-------------

### Encumbered investments

Investments with a carrying value of R2,197,566,525 (2019:R1,899,477,077) are encumbered in respect of long term liabilities above with a carrying value of R2,415,000,000 (2019:R2,415,000,000) as disclosed in the other investments note (note 8). The amount of R2,415,000,000 consist of three bonds for which structured deposit sinking funds were established.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

### 17. Retirement benefit obligations

#### Retirement Funds

The City provides retirement benefits for its employees and councillors. The contributions to fund obligations for the payment of retirement benefits are expensed in the year in which they become payable. The City contributes to defined contribution and defined benefit funds. These funds are multi-employer funds.

The council took a resolution in terms of an agreement with SALGA that the contribution rate to pension funds will be capped at 18% of salaries for new members joining pension funds after 1 July 2012 and also that the deducted contribution will only be transferred to defined contribution pension funds.

#### Defined Contribution Funds

Where an employee has rendered services to the City during the year, the City recognises the contribution payable to a defined contribution plan in exchange for that service immediately as an expense.

#### Defined Benefit Plans

The City does not apply "defined benefit accounting" to the defined benefit funds to which it is a member where these funds are classified in terms of GRAP 25 as multi-employer plans, as sufficient information is not available to apply the principles involved. The City contributes to the following defined benefit plans, which are governed by the Pension Fund Act of 1956 due to the nature of these funds and the fact that there is no consistent and reliable basis for allocating the obligation. Plan assets and cost to individual entities participating in the plan, these funds are accounted for as defined contribution funds in terms of paragraph 31 of GRAP 25, the total contributions are included in employee related costs, Note 29. As a result, GRAP 25 is applied and such funds are accounted for as defined contribution funds. The City's participation in these plans is limited to the obligation of its own employees. Due to the nature of the funds, the obligation for each fund cannot be reasonably determined.

The following funds have been treated as defined contribution plans although they are defined benefit funds:

#### 1. Joint Municipal Pension Fund

The average contribution rate payable is 7.5% by the members and on average 22% by the City of Ekurhuleni. The last actuarial valuation on this fund was performed in September 2018 certified that the fund is in a sound financial state. The City of Ekurhuleni has 87 employees in this plan.

#### 2. Municipal Employees Pension Fund

The average contribution rate payable is 7.5% by the members. The City of Ekurhuleni contributes 22% and 18% of members who existed as at 30 June 2012 and 01 July 2012, respectively. The last actuarial valuation on this fund was performed in February 2017 and it was certified that the fund is in a sound financial state. The City of Ekurhuleni has 1293 employees in this plan.

#### 3. South African Local Authorities Pension Fund

The average contribution rate payable is 9% by the members and on average 20.78% by the City of Ekurhuleni. The last actuarial valuation on this fund was performed as at 1 July 2015 and it was certified that the fund is in a sound financial state. The City of Ekurhuleni has 77 employees in this plan.

Germiston Municipal Retirement Fund (GMRF) is a defined contribution fund for active contributing members but a defined benefit fund for certain pensioners under the old rules taken in the rules of the fund. During 2005 GMRF outsourced the full administration of the pensioners component which relates to the old rules of the defined benefit fund.

To the extent that a surplus or deficit is in place, based on available information, this may affect the amount of future contributions once these are assessed. In the case of surpluses, no change is made in the rate of contributions. In the case of deficits, the City will increase contributions on a phased basis. To the extent that the full discounted value of obligations to the funds is not fully accounted for at year end, a contingent liability arises and is reported on accordingly.

#### 2. Accrued Leave Pay

Liabilities for annual leave are recognised as they accrue to employees. The liability is based on the total accrued leave days at year end. Refer to provisions note (note 18) for leave pay provision.

#### Retirement benefit obligation (medical aid plan)

The City provides post-retirement benefits by subsidising the medical aid contributions of certain retired staff. According to the rules of the medical aid funds, with which the City is associated, a member (subject to the applicable conditions of service), on retirement, is entitled to remain a continued member of such medical aid fund, in which case the member is liable for the portion as determined by Council from time to time, of the medical aid membership fee, and the City for the remaining portion.

The number of employees who are eligible for post-retirement benefits as at 30 June 2020 are 12,560 (2019: 12,142) in-service employees and 1890 (2019: 1,863) pensioners. The actuarial valuation was performed by Zaqen Actuaries (Pty) Ltd by applying the Projected Unit Funding method.

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

### 17. Retirement benefit obligations (continued)

#### Other assumptions

Assumed healthcare cost trends rates have a significant effect on the amounts recognised in the statement of financial performance. A one percentage point change in assumed healthcare cost trends rates would have the following effects:

	One percentage point increase	One percentage point decrease
Medical inflation (service cost and interest cost)	337,702,406	300,464,073
Medical inflation (liability)	2,231,349,223	2,001,142,609
Valuation interest rate (service cost and interest cost)	283,337,035	369,186,535
Valuation interest rate (liability)	1,905,816,457	2,401,379,142

	2020 R	2019 R	2018 R	2017 R	2016 R
Defined benefit obligation	(2,130,088,581)	(2,058,871,581)	(1,954,081,581)	(2,202,485,063)	(2,527,235,581)
Deficit	(2,130,088,581)	(2,058,871,581)	(1,954,081,581)	(2,202,485,063)	(2,527,235,581)
Experience adjustments on plan	(17,870,000)	(18,863,000)	(128,639,000)	(234,450,000)	(271,494,000)

### 18. Provisions

#### Reconciliation of provisions - 2020

	Opening Balance	Additions	Utilised during the year	Decreased during the year	Change in discount factor	Total
COLD provision	29,589,263	-	(2,417,806)	-	-	27,171,457
Bonus provision	61,522,024	-	(19,194,408)	-	-	42,327,616
Leave provision	511,380,626	208,184,884	(185,149,020)	-	-	534,416,490
Landfill rehabilitation provision	354,859,369	-	(33,158,439)	-	38,360,298	360,061,228
Long service awards	500,851,000	35,333,000	(8,644,424)	(70,485,576)	49,226,000	506,280,000
GMRF	-	85,928,869	-	-	-	85,928,869
	<b>1,458,202,282</b>	<b>329,446,753</b>	<b>(248,564,097)</b>	<b>(70,485,576)</b>	<b>87,586,298</b>	<b>1,556,185,660</b>

#### Reconciliation of provisions - 2019

	Opening Balance	Additions	Utilised during the year	Increased during the year	Change in discount factor	Total
COLD provision	31,337,074	154,889	(1,902,700)	-	-	29,589,263
Bonus provision	80,597,388	21,807,050	(40,882,414)	-	-	61,522,024
Leave provision	500,255,652	233,840,546	(222,715,572)	-	-	511,380,626
Landfill rehabilitation provision	348,631,220	-	(30,999,156)	-	37,227,305	354,859,369
Long service awards	466,339,000	34,874,000	(6,959,789)	(39,220,211)	45,818,000	500,851,000
GMRF	13,034,576	-	(13,034,576)	-	-	-
	<b>1,440,194,910</b>	<b>290,676,485</b>	<b>(316,494,207)</b>	<b>(39,220,211)</b>	<b>83,045,305</b>	<b>1,458,202,282</b>

Non-current liabilities	979,441,554	885,299,632
Current liabilities	576,744,106	572,902,650
	<b>1,556,185,660</b>	<b>1,458,202,282</b>

The provision relates to claims against the City, instituted by the Germiston Municipal Retirement Fund in terms of the rules of the pension fund where the required investment yield was not been achieved. The timing of the outflow is uncertain, as well as the relating amount due to interest charges.

#### COLD provision

This provision is made for future expected outflows as a result of the City's obligation to contribute towards occupational injuries with various employees in the old Benoni and Germiston local municipalities. The discount rate used in determining the present value of the obligation is 10.81% (2019:10.68%) and the inflation assumption used for the increase in expenses/contributions is 6.7% (2019: 6.5%).

#### Leave and bonus provision

The liability is based on the total accrued leave days at year end, which includes section 57 employees. The bonus is performance based, and is dependent on a performance assessment. The timing of both the leave and bonus is uncertain.

#### Landfill rehabilitation provision

In terms of GRAP 19, provisions should be evaluated at each year-end to reflect the best estimate at that date of the provision. The discounting rate is 10.81% (2019:10.68%). The timing of outflow is uncertain, as well as relating amounts due to discounting and charges in inflation rates.

The net result of the re-estimation had the following effect on the current year amounts:

Decrease in the cost of property, plant and equipment R24,218,793 (2019: decrease of R13,791,164)

Amount recognised in profit and loss due to re-estimation where the adjustment exceeded the carrying amount of the asset by R8,939,646.34 (2019:R13,791,164)

#### Long service awards provision

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

### 18. Provisions (continued)

An actuarial valuation for 2020 was performed by Zaqen Actuaries (Pty) Ltd.

Discount rate used: 7.40% (2019: 8.00%)

CPI used: 4.23% (2019: 4.96%)

Salary increase rate used: 6.7% (2019: 6.5%)

### 19. Trade and other payables from exchange transactions

Licence fees	14,831,883	13,433,371
Maintenance guarantees: new township development infrastructure	6,951,769	5,018,577
Other payables	665,276,159	469,623,376
Receipts in advance	751,664,790	568,344,906
Retentions	956,248,379	882,428,396
Trade payables	5,501,041,662	5,135,806,686
Unclaimed salaries	8,333,494	8,166,400
VAT balance on outstanding debtors	642,520,326	428,372,082
	<b>8,546,868,462</b>	<b>7,511,193,794</b>

### 20. Deposits

Consumer deposits - electricity and water	935,100,451	916,990,548
---	-------------	-------------

Guarantees in lieu of electricity and water deposits is R164,507,780 (2019:R 143,827,981).

### 21. Unspent conditional grants and receipts

The unspent conditional grant and receipts relates to funds received for multi-year capital projects for which the funds are not yet spent at year end, other than that the conditions were met.

Unspent conditional grants and receipts comprises of:

#### Unspent conditional grants and receipts

HIV/AIDS	95,224	761
FMG	435,233	396,077
SETA	6,997,896	4,729,237
USDG	61,084,003	290,862,219

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

### 23. Property rates

#### Rates received

Residential	2,553,550,438	2,313,067,619
Commercial	2,638,592,066	2,756,052,550
Small holdings and farms	14,023,410	14,028,730
Vacant land	284,168,774	277,465,046
Other properties	178,212,171	34,816,787
Property rates - penalties and collection charges	83,401,449	83,532,438
	<b>5,751,948,308</b>	<b>5,478,963,170</b>

#### Valuations (R'000)

Residential	309,877,836	307,436,088
Commercial	125,168,594	123,771,447
Provincial and National Government	6,663,674	6,645,259
Municipal	4,230,048	4,228,875
Small holdings and farms	6,494,131	6,552,932
Sectional title	56,837,101	54,898,919
Vacant land	13,496,103	13,103,817
Other	22,702,151	25,419,978
	<b>545,469,638</b>	<b>542,057,315</b>

Valuations on land and buildings are performed every 4 years. The last general valuation came into effect on 1 July 2017. Interim valuations are processed on an annual basis to take into account changes in individual property values due to alterations and subdivisions.

Rates are levied on a monthly basis, interest is levied on outstanding account if paid after due date.

### 24. Service charges

Sale of electricity	14,764,479,920	13,857,573,322
Sale of water	5,123,977,848	4,428,833,210
Solid waste	1,354,567,504	1,317,984,027
Sewerage and sanitation charges	1,784,785,421	1,476,648,437
Fresh produce market	24,011,827	22,298,167
Other service charges	44,409,145	50,587,454
	<b>23,096,231,665</b>	<b>21,153,924,617</b>

### 25. Rental of facilities and equipment

#### Facilities and equipment

Rental of facilities	84,060,862	75,980,706
Rental of equipment	38,295	22,017
	<b>84,099,157</b>	<b>76,002,723</b>

Included in the above rentals are operating lease rentals at straight-lined amounts of R8,740,476 (2019: R7,484,051) as well as month to month rentals of R31,306,210 (2019: R30,999,472).

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

### 30. Remuneration of councillors

#### In-kind benefits

The Executive Mayor, Speaker and Mayoral Committee Members are full-time. Each is provided with an office and secretarial support at the cost of the Council.

The Executive Mayor has use of a Council owned vehicle for official duties.

The Executive Mayor has full-time bodyguards.

The salaries, allowances and benefits of councillors are within the upper limits of the framework envisaged in section 219 of the Constitution of South Africa.

#### Related parties

Guarantees issued as required by the MFMA on behalf of municipal entities

COE guaranteed the Nedbank loan to ERWAT, with a carrying value of R404,367,914 (2019: R447,970,486). The guarantee shall expire at 15h00,10 calendar days after the full repayment or settlement of all amounts owed by ERWAT to Nedbank Ltd in terms of the contract. ERWAT has agreed to cede to COE claims against its book debtors, in the event of ERWAT defaulting on its obligation in terms of the loan. ERWAT thereby cedes, assigns and transfers unto and in favour of COE all of ERWAT's rights, title and interest in and to all book debts, present and future, due and to become due to ERWAT, in the event that ERWAT defaults on its obligation in terms of the loan of R550 million advanced by Nedbank Ltd. This cession shall endure for so long as ERWAT is indebted to Nedbank Ltd, and the guarantee provided by COE in favour of Nedbank Ltd as guarantee for the loan remains in effect.

No contingent liability has been raised for this guarantee as the City believes that the entity is financially sound.

### 43. Comparative figures

Certain comparative figures have been reclassified as a result of the Municipal Standard Chart Of Accounts (mSCOA).

### 44. Financial instruments disclosure

Exposure to currency, interest rate, liquidity and credit risk arises in normal course of the City's operations. This note presents information about the City's exposure to each of the above risks, policies and processes for measuring and managing risk, as well as the City's management of capital. Further quantitative disclosures are included throughout these financial statements.

The accounting policy for financial instruments was applied to the following statement of financial position items:

#### 2020

##### Financial assets

	At amortised cost	At cost	Total
Trade and other receivables from exchange transactions	5,518,649,498	-	5,518,649,498

### 45. Risk management

#### Capital Risk Management

The City's objectives, when managing capital, are to safeguard the City's ability to continue as a going concern in order to maintain an optimal capital structure to reduce the cost of capital.

The capital structure of the City consists of debt, which includes the borrowings disclosed in note 16 and cash and cash equivalent disclosed in note 15.

Consistent with others in the industry, the City monitors capital on the basis of the gearing ratio.

There are no externally imposed capital requirements.

There have been no changes to what the City manages as capital, the strategy for capital maintenance or externally imposed capital requirements from the previous year.

The gearing ratio 2020 and 2019 respectively are as follow:

Other financial liabilities	(9,962,943,049)	(8,681,348,656)
Less: Cash and cash equivalent	1,644,224,892	3,430,881,905
Net Debt	(8,318,718,157)	(5,250,466,751)
Total equity	47,757,228,338	48,010,744,558
<b>Total capital</b>	<b>39,438,510,181</b>	<b>42,760,277,807</b>

### Financial risk management

The City's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and price risk), credit risk and liquidity risk.

The City's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the City's financial performance.

Risk management is carried out by the risk management department under policies approved by the accounting officer. The City's treasury identifies, evaluates and hedges financial risks in close co-operation with the City's operating units. The accounting officer provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments, and investment of excess liquidity.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

### 45. Risk management (continued)

#### Liquidity risk

The City's risk to liquidity is a result of the funds available to cover future commitments. The City manages liquidity risk through an ongoing review of future commitments and credit facilities.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analysis the City's financial liabilities and net-settled derivative financial liabilities into relevant maturity groupings based on the remaining period at the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant.

#### Interest rate risk

The City's interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the City to cash flow interest rate risk. Borrowings issued at fixed rates expose the City to fair value interest rate risk. The City's policy is to maintain approximately 100% of its borrowings in fixed rate instruments.

At year end, financial instruments exposed to interest rate risk is as follows:

#### Cash flow interest rate risk

Financial instrument	Current interest rate	Due in less than a year	Due in one to two years	Due in two to five years
Consumer debtors	-	5 963 553 255		
Long term receivables	variable %	204 835	409 670	2 730 695

#### Fair value interest rate risk

Financial instrument	Current interest rate	Due in less than a year	Due in one to two years	Due in two to five years	Due after five years
Long term and other liabilities	Various	2 338 021 378		1 457 898 957	6 167 022 715

#### Sensitivity analysis

##### Financial assets

##### Long-term, receivables

As at 30 June 2020, should the average interest rate at that date increase by 1%, with all other variables remaining the same, the impact on the statement of financial position would have been R33,354 with the opposite effect if the interest rate had been 1% lower.

##### Investments

As at 30 June 2020, should the average interest rate at that date increase by 1%, with all other variables remaining the same, the impact on the statement of financial position would have been R22,663,889 with the opposite effect if the interest rate had been 1% lower.

##### Financial liabilities

Changes in the interest rate as at 30 June 2020 would have had no impact on the statement of financial performance, as all borrowings are at a fixed interest rate.

#### Currency risk

The City is not exposed to foreign-currency risk.

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

Figures in Rand	2020	2019
-----------------	------	------

### 45. Risk management (continued)

#### Credit risk

Credit risk consists mainly of cash deposits, cash & cash equivalents, derivative financial instruments and trade debtors. The City only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Trade receivables comprise a widespread customer base. Management evaluated credit risk relating to customers on an ongoing basis.

If customers are independently rated, these ratings are used. Otherwise, if there is no independent rating, risk control assesses the credit quality of the customer, taking into account its financial position, past experience and other factors. Individual risk limits are set based on internal or external ratings in accordance with limits set by the board. The utilisation of credit limits is regularly monitored. Sales to retail customers are settled in cash or using major credit cards.

Financial instrument	Controlling entity - 2020	Controlling entity - 2019
Other Investments	2,469,622,604	2,085,662,816
Receivables from exchange	5,518,649,498	4,612,811,982
Receivables from non exchange	5,113,059	467,939,669
Statutory receivable	863,950,264	-
Cash and cash equivalents	1,644,224,892	3,430,881,905
Listed and Unlisted shares	4,000,000	4,000,000
	<b>10,505,560,317</b>	<b>10,601,296,372</b>

The City has a R4,000,000 investment in unlisted shares, which is the exposure to price risk. The price risk on this investment cannot be determined due to the fact that the shares are not listed and therefore unknown.

### 46. Going concern

This annual financial statements have been prepared on a going concern basis.

Management has reviewed the City's cash flow forecast for the period ended 30 June 2020 and the budget for the next financial year budget is fully funded,

in the light of this review and the current financial position, management is satisfied that the City has, or has access to, adequate resources to continue in operational existence for the foreseeable future. The City revised its budget for the the following year due to the impact of the Covid-19 pandemic and to ensure that its operating activities will be within its financial measures.

#### Covid 19 - Impact

The City has assessed the impact of Covid-19 pandemic on the financial position and liquidity requirements. A special budget adjustment was passed on 25 June 2020 to address the impact in the reduction of the consumption of services and fallen collection levels.

The City had to reduce revenue income by R1,3 billion (R973m of operating revenue and R327m of own revenue funded capital budget) and also the operating expenditure was reduced by the same amount. National Treasury approved the relaxation for the utilisation of capital grants for financing operating expenditure due to the decline in revenue and collection rates. This approval did not results in additional expenditure or new procurement activities but a change in funding process.

The City assessed the impact of the Covid-19 on its debtors collection process and increased the provision allocation for bad debts for accounts deemed to high risk of default. This process will be continuously monitorised in the current year. Management has considered all risk factors, collections rates, credit ratings & downgrades and other available information in assessing adequacy of provisions and impairments process at year end..

#### The City has spent on Covid19 relief measures as follows:

Provision of wall mounted sanitizers/ wash soap, deep cleaning and disinfection of facilities	25 345 887
Procurement of personal protective equipment	19 381 771

The budget process for 2021 was reduced due to decrease in consumption of services. The City has put measures in place to address the economic depression of its residence and relief measures to them.

### 47. Events after the reporting date

There were no subsequent events affecting this annual financial statements at the reporting date.

Irregular expenditure of R463,702,233 was approved by Council on 30 September 2020 for write off. This write off relates to chemical toilets, installation & commissioning of data equipment, repairs & maintenance of low & medium voltage underground cable networks and maintenance of various CoE buildings.

### 48. Unauthorised, Fruitless, Wasteful and Irregular expenditure

Items of unauthorised, irregular and fruitless and wasteful expenditure are referred to MPAC for further investigations and determination of appropriate steps to be taken. During the current year the Council approved R12,157,965 (2019: R210,218,230) for irregular expenditure and R5,279,993 (2019: R2,025,957) for fruitless expenditure for write-off. The remaining amounts are still under investigation by the MPAC and other organs of state. No resolutions were not yet available.

## Notes to the Annual Financial Statements

### 51. Deviation from supply chain management regulations

Paragraph 12(1)(d)(i) of Government gazette No. 27636 issued on 30 May 2005 states that a supply chain management policy must provide for the procurement of goods and services by way of a competitive bidding process.

SCM regulation (par. 36) of the same gazette states that the accounting officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the accounting officer and includes a note to the annual financial statements.

**The expenses incurred, as listed hereunder, have been approved/condoned**

Emergencies	-	5,462,487
Sole supplier	-	40,240,866
Other - Impractical	4,080,000	1,113,937,630
	<b>4,080,000</b>	<b>1,159,640,983</b>

During the year the accounting officer ratified minor breaches in line with SCM regulation 36(2) R0,00 (2019:R0)

Extensions of contracts include inter-alia the following amounts:

2020

Other services	R36,819,927
Consultants	R171,544,532
Maintenance and other related services	R12,967,522

2019

### 53. Commitments

#### Authorised capital expenditure

##### Already contracted for but not provided for

• Property, plant and equipment	3,862,261,469	4,694,555,762
---------------------------------	---------------	---------------

##### Not yet contracted for and authorised by accounting officer

• Other financial assets	938,202,241	2,545,371,335
--------------------------	-------------	---------------

#### Total capital commitments

Already contracted for but not provided for	3,862,261,469	4,694,555,762
Not yet contracted for and authorised by accounting officer	938,202,241	2,545,371,335
	<b>4,800,463,710</b>	<b>7,239,927,097</b>

#### Total commitments

#### Total commitments

Authorised capital expenditure	4,800,463,710	7,239,927,097
--------------------------------	---------------	---------------

This committed expenditure relates to the acquisition of property, plant and equipment for the 2019/2020 financial year (Approved Capital Expenditure Programme) based on the projects values as approved by Council for the City's Capital Budget programme for the following year for which suppliers contracts are in place. These commitments will be financed by appropriated grants, internally generated funds (revenue or accumulated surplus), and other borrowings options where applicable.

Commitments not yet contracted for and authorised, relate to capital projects as approved by Council on the City Capital Budget which there is no contracts in place at the end of the financial year.

#### Operating leases - as lessee (expense)

##### Minimum lease payments due

- within one year	-	31,486,536
- in second to fifth year inclusive	-	542,786
	-	<b>32,029,322</b>

Operating lease payments represent rentals payable by the City for certain of its office buildings. Leases are negotiated for periods ranging from one year to five years, for office buildings. The rentals escalate on average at 7.00% (2019: 8.00%) for office buildings.

The actual lease contract amounts range between R6,000 and R642,118 (2019: R6,000 and R642,118) per month on the office buildings.

#### Operating leases - as lessor (income)

##### Minimum lease payments due

- within one year	8,690,441	7,910,246
- in second to fifth year inclusive	24,142,530	26,452,846
- later than five years	18,436,775	20,473,834
	<b>51,269,746</b>	<b>54,836,926</b>

Certain of the City's property generates lease rental income. The majority of these leases are on a month to month basis. Lease periods range from month-to-month up to 99 years. Monthly lease payments range from R0.08 (2019: R1) (social benefit) up to R318,608 (2019: R280,000).

### 54. Change in estimate

#### Property, plant and equipment

##### Economic entity

Useful lives review for 2019/2020 had the following impact:

Depreciation expense before remaining useful lives review: R83,794,206  
 Depreciation expense after remaining useful lives review: R119,448,028  
 Future increase in depreciation due to review: R35,653,822

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

### 54. Change in estimate (continued)

#### Discount rate

The discount rate has changed to 10.81% (2019: 10.68%). The impact of this change has been disclosed in the relevant note, where applicable.

### 55. Prior period errors

#### 2019

The Intangible assets increased due to the reversal of the accumulated impairment recognised previously due to incorrect useful lives on ERP modules that were not in line with the previous accounting system, the useful lives were armortised over 4 years instead of 20 years for similar programs used by the city, which led to reduction of amortisation of R56,327,627. Furthermore, part of the development costs previously derecognised were capitalised as they are part of the development process.

Assets under construction decreased due to the corrections of completed projects previously partially capitalised as a results of additional project management costs and other consumer price adjustments costs incurred after the completion of the construction phase or where there were disputes on contract variations. These corrections do not have an impact on assets gross values but result in additional accumulated depreciation for prior period.

Other receivable from non-exchange decreased due to proceeds from the disposal of assets recognised as a receivable, but when the payment was received in previous year, it was not deducted from the receivables, correction of court claims raised as receivables previously.

Inventory, increased due to additional transfer/ capitalisation of other assets under construction.

The decrease in Investment property and PPE relates to the depreciation of correction of prior period capitalisation, including capitalisation of projects management costs incurred after the construction phase.

The increase in trade payables and staff costs related to the accrual of the 13th cheque bonus for the period worked till year end.

Reclassification between bulk purchases and general expenses relates to City electricity consumption on its own buildings.

The net impact of these corrections lead to decrease in the accumulated surplus as previously reported.

The correction of the error(s) results in adjustments as follows :

Statement of Financial Position	Balance as previously reported	Balance restated	Adjustment
Investment property	504,387,320	502,247,151	(2,140,169)
Property, plant and equipment	55,215,407,492	55,126,113,172	(89,294,320)

### 58. Budget differences

#### 1. 2020

##### A. ADJUSTMENT BUDGET PROCESS

The City of Ekurhuleni had two adjustment budgets during the 2019/20 financial year.

The first adjustment budget was approved in a Council meeting held on the 30th January 2020 and the 2nd special adjustment budget was approved in a meeting held on the 28th May 2020. Below are the summaries of the adjustments.

##### First adjustment budget (30th January 2020)

###### Revenue

The operating revenue shows a net increase of R1.07 billion due to the following factors:

- The interest on external investments of R3.0 million is removed from Human Settlements Department as it is budgeted for under Finance Department;
- Additional revenue of R465.6 million is recognised from traffic fines (to bring the total revenue from this source to R600.0 million) due to recommendations from the Auditor-General on the accounting treatment of this item; and
- Transfers and subsidies (grants) show a net increase of R609.7 million.
  - o Energy Efficiency Demand Management System Grant (EEDMS) - has a reduction of R914,550, as part of R12.1 million on electrification programme, due to the allocation being gazetted as withdrawn after the budget was already adopted;
  - o Finance Management Grant (FMG) - R396,078 increase was approved as a roll-over;
  - o HIV/AIDS- R760 - this was an immaterial roll-over amount;
  - o Sector Education and Training Authority (SETA) - this amount of R4,729,237 was an automatic roll-over as the unspent funds do not form part of roll-over applications;
  - o Sports, Recreation, Arts and Culture (SRAC) Provincial Grant – R282,535 was approved as a roll-over and R1,500,000 was an additional allocation;
  - o Public Transport Network Grant (PTNG) – R94,695,726 – this amount is a transfer from Capex to Opex;
  - o Human Settlements Development Grant (HSDG)- R 497,341,770 was approved as a roll-over and appropriated through a virement. This amount was transferred to the City after the budget was approved in May 2019;
  - o Urban Settlement Development Grant (USDG) - grant shows a net adjustment of (R11,904,479) due to the following :
    - Reduction of R38,640,000 – Ekurhuleni Housing Company (EHC) surrendered the funds back to Human Settlements;
    - An addition of R24,235,521 -required by ERWAT to fund the water treatment plants; and
    - An addition of R2,500,000 - required for capacity for the implementation of USDG projects.
  - o Ekurhuleni Housing Company receives a grant of R12.0 million from Provincial Social Housing (SHRA).

###### Expenditure

The operating expenditure increased from R38.8 billion to R39.8 billion, an increase of 1.45%. The major items are:

The employee costs decrease by a net of R23.0 million due to the following:

- o The Department of Environment and Resource Management has identified savings from funded positions to fund its additional request amounting to R12.0 million and the reduction of expenditure to fund debt impairment amounting to R16.0 million; and
- o The BBC requested a grant of R5.0 million to fund its shortfall on employee related costs;
- Debt impairment increases by R789.5 million to cover the additional revenue from traffic fines as well as provision for bad debts on uncollectable assessment rates due to the decision by the Property Rates Appeal Board to reduce the values of some properties;
- Depreciation and asset impairment increase by R1.1 million to cover for end of year accounting transactions;
- Other materials reduce by R168.9 million based on the level of spending by departments over the past six months;
- Contracted services increase by a net of R423.0 million due to Increases in additional requests on security, cleaning, roads and ICT infrastructure maintenance;
- Transfers and subsidies to external parties (entities in this case) show a net reduction of R23.4 million due surrendering of R38.6 million by EHC, EHC tax liability of R6.0 million, movements of R35.0 million between departments (Council General and Legal Services) and transfer of R24.2 million to ERWAT; and
- Other expenditure has a net increase of approximately R61.5 million. This is a combination of software licenses, operating leases and travel and accommodation.

###### Capital Budget

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

---

### 58. Budget differences (continued)

The adjustments to the capital budget of the **City and its entities** results in a net decrease of **R609,525,974**. The proposed adjustment is a combination of:

- Re-allocations of funds between projects;
- Rescheduling of budgets re-scheduled over the MTREF period in line with the projects' readiness;
- Allocations from the City to its entities; and
- Allocation of 2018/19 unspent grants approved for roll over to 2019/20.

The following were adjustments in grants from National and provincial government

- EEDMS - grant is reduced to R0 – this is because of National Treasury withdrawing the fund. The gazette was published after the budget had been approved in May 2019.
- Due to refinancing between External loans and Revenue, the former was reduced by R157 million while the latter increased by the same amount;
- NDPG – is increased by R29 million as per the DoRA mid-year adjustment;
- SRAC Provincial grant – This grant received a roll-over of R163,989 from the 2018/19 financial year;
- PTNG - Transfer to Opex as per grants conditions; and
- SHRA – Allocation of R1.5 million to EHC.

### Second Special Adjustment budget (28 May 2020)

The special adjustment budget was triggered by the following factors;

- The declared national state of disaster and the **subsequent lockdown resulted in material under collection of revenue**;
- Stopping of part of capital grant allocations to municipalities issued by National Treasury in special gazette number 43180 dated 30 March 2020; and
- Approvals obtained from National Treasury and the national Department of Transport to reallocate part of the capital conditional grants from capital to operating budget. This is to assist the City to alleviate the impact of COVID-19.

### Revenue

- The decline in billed revenue on industrial and commercial consumers of water, electricity and, sanitation amounting to R873.0 million;
- Revenue from rental of the City's facilities like lapas, swimming pools and lakes is not expected to be billed as social and community facilities are closed to comply with physical distancing. The reduction is R12.8 million. The remaining revenue is still expected to be collected from rental of the City's houses and flat in which employees reside;
- Fines and penalties are expected to decline by R31.2 million. The remaining revenue will come from speeding cameras;
- Licenses and permits are expected to decline by R55.8 million as they were just recently permitted in government gazette 43192 issued on 7 May 2020; and
- Government grants increase by R384.0 million from the R323.0 million of USDG and R61.0 million of PTNG that are moved from the capital budget to the operating budget.

The net effect is a **decline of R588.8 million in operating revenue**

### Expenditure

- The employee costs decrease by a net of R293.7 million due to the impact of the lockdown on the budgeted revenues of the City;
- An upward adjustment of R3.1 million was made to cover the increase in remuneration of Councillors for 2019/20 FY;
- Increase in provision for debt impairment of R620.0 million due to the decline in service charges revenue;
- Decrease in finance charges amounting of R227.0 million as the external loans will be taken late in the financial year;
- Bulk purchases (water and electricity) decline of R620.6 million as the revenue therefrom has declined;
- Other materials decline by R27.4 million. Procurement is limited to essential services as allowed by the lockdown regulations. The reduction in this line item is not significant as it was compensated by the additional revenue from the USDG and PTNG;
- Contracted services is increased by R8.0 million to cover the costs of COVID-19 and will be covered by part of the USDG and PTNG transfers from capital to operating budgets;. As with other materials, procurement is limited to essential services as allowed by the lockdown regulations; and
- Other expenditure on items such as entertainment for senior managers, laundry service, printing and publications and travelling and accommodation reduce by R46.5 million. These items are not part of essential services.

### Capital Budget

The City's capital budget is undergoing special adjustments due to the following factors;

- Stopping of the R120.0 million portion of the USDG by National Treasury;

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

---

### 58. Budget differences (continued)

- Reallocation of R323.0 million of USDG from capital to operating budget to fund COVID-19 operational expenditure;
- Reallocation of R6.0 million of PTNG from capital to operating budget to also fund COVID-19 related operational expenditure; and
- Reallocation of R55.0 million of PTNG to fund operational requirements for Integrated Public Transport Networks; and
- Downgrading of the country's grading to "junk investment" status, meaning that external borrowings will be obtained at a higher cost, necessitating a decrease in the amount of external borrowings

### B. THE FOLLOWING REASONS ARE FOR VIREMENTS PROCESSED POST THE FINAL ADJUSTMENT BUDGET

#### Expenditure

##### i) Employee related costs

Reduction on employee related costs as the payment holiday was granted by SARS on Skills Development Levy.

##### ii) Transfers and grants

Transfers and subsidies were increased as additional funds were required for the burial of indigents.

##### iii) Other expenditure

Various items within this category were reprioritized to fund the additional funds required above.

### C. EXPLANATION OF VARIANCES: FINAL BUDGET AND ACTUAL AMOUNTS

#### Revenue

The total revenue for the year, excluding capital transfers and contributions, is 5.0% less than the budgeted revenue. The actual revenue amounts to R37.2 billion whilst the budgeted revenue amounts to R39.0 billion, with the negative variance of R1.8 billion.

The contributing factors to the negative deviation are as follows:

##### i) Transfers recognised – operational

The deviation is mainly caused by poor expenditure on HSDG as a result of the funds being roll-over from last FY and interruption by lockdown as Contractors could not continue with housing construction.

##### ii) Other own revenue

The variance is as a result of under recovery on various revenue sources such as:

Interest on trade debtors – deviation is as a result of adjustments emanating from the Valuation Appeal Board Outcome in relation to other industries property rates. The City has also suspended interest on outstanding debtors with effect from 01 April 2020 with the intension to provide relief to residents following negative impact of COVID-19.

Licenses and permits – deviation is as result of closure of offices during the fourth quarter in response to the COVID-19 pandemic.

#### Expenditure

The total expenditure for the year is R558 million less than the budgeted expenditure. The actual expenditure amounts to R39.0 billion whilst the budgeted expenditure was R39.6 billion.

The following major expenditure items are analyzed:

##### i) Debt impairment

Final calculation for debt impairment was based on the actual consumer debt and determined as per provision for Bad debt policy

##### ii) Finance cost

Finance cost is budgeted according to all the existing loans of City plus the interest payable on new loans obtained during the financial year.

##### iii) Other expenditure

# City of Ekurhuleni Metropolitan Municipality

Annual Financial Statements for the year ended 30 June 2020

## Notes to the Annual Financial Statements

---

### 58. Budget differences (continued)

Negative deviation is as a result of several expenditure items within the category. The main contributors are the cost containment measures implemented on general expenses.
